

Tradin Organic Agriculture

Your Source for *Organic* Raw Materials

Tradin's Organic Cashew, Pineapple, Mango, and Passion fruit project in *Vietnam*

Organic initiatives and INNOVATION

Tradin Organic Agriculture started her Vietnamese operation by finding a local partner, who had experience in outgrowing, sourcing and export of agricultural produce. After a number of visits to Vietnam we selected Vinh Phuc Co., Ltd. as our partner to develop together organic projects in Vietnam, as they had the needed experience and also a keen interest in the start up development of organic agriculture in Vietnam. An intensive training of the employees of Vinh Phuc Co., Ltd. resulted in an organic task-force, which traveled all over southern Vietnam to establish farmers networks. These farmers networks were guided and trained by Tradin's in house agronomist Mr. Peter Kollath, Control Union and of course the field officers of Vinh Phuc.

Inspection of our Pineapple project and farmers in the highlands.

Now 7 years later - having gone through the first difficult years in which conversion period, trial shipments, quality questions and the likes had to be overcome – we are proud to say that the Vietnamese projects are a vital part of our organic sourcing activities. We are now supplying the world with top quality organic cashews, pineapple, mango and passion fruit products.

Organic integrity and CERTIFICATION

We only process raw materials from our farmer's networks and our internal control system (ICS) guarantees the organic traceability of all our products. Both our quality department (using external accredited laboratories) and our customers test our Vietnamese organic products regularly on the presence of residues, mycotoxins and microbiological criteria and we are proud to say that not once in all these years there was a positive testing on chemical residues or mycotoxins. The projects are certified organic according to the Regulation (EEC) no. 2092/91 of the EU, the NOP (National Organic Program) of the United States and the JAS (Japanese Agricultural Standards).

Product *Quality* and controlled PROCESSING

The use of long-term contracted factories, also under supervision of our local partner, assures us of the highest product quality. In the case of cashews we decided to build our own dedicated organic processing unit to make sure that all processing steps were according to international standards. An independent agency (SGS) does the final quality control of all our shipments. All the factories we use comply with HACCP principles.

Pineapple transport.

OUR *Vietnamese* organic products

Cashews

240's

320's

450's

LWP's

SWP's
