

ORGANIC DEVELOPMENT SERVICES

Organic Development Services (ODS) supports **organic growers** and **processors to mitigate supply chain risks and fulfill CSRD** ambitions. Through its network of experts and practitioners, ODS facilitates **solutions** and **innovations** driven by the organic food industry.

Agriculture as usual is no longer an option.

The **escalating threats** of climate change and environmental degradation pose significant **risks to global food supply chains**. The stakes have never been higher: \$44 trillion of value generated by global businesses is moderately or highly dependent on nature and its services*.

Regenerative organic practices provide a **proven pathway** to resilience and sustainability. However, achieving growth in sustainable farming requires market access, technical knowledge, and scalable financing for global SMEs—a unified approach is critical to addressing these systemic challenges.

We want to solve this problem. With Regenerative Organic Agriculture.

ODS offers **tailormade business cases** for **regenerative organic best practices** to mitigate **risks** and fulfill **CSRD ambitions**. Linking the right experts and **network**, ODS supports the identification and implementation of technical assistance needs on a case-by-case basis.

Scouting

- Identification of high potential farmer groups, sourcing areas and SMEs
- Gap assessment: distance to market

Ad-hoc consulting

- Quality
- Certification
- Processing technology
- Farm technology and inputs
- Business, finance and operations management

Agricultural design

- Viable solutions and operational planning for factories and farms
- Training schemes
- Evaluation and scaling
- Disseminate and implement innovations
- Transition to agroforestry

Research

- Cross-country exchange of best practices
- Organic farm research and demo plots
- Facilitate bottom up innovation

Digitization

- Select the right tools
- Assist on setup costs
- Data literacy training
- Development of data incentives

Measurable Impact

110,000+

Farmers reached

1,000+

Jobs created and improved

91,000

Ha under organic cultivation

40+

Enterprises strengthened
